The members of schedule snake

# What And Why?

A service that offers a smooth process for educators to create and manage courses, and for students to easily apply for enrollment into those courses.

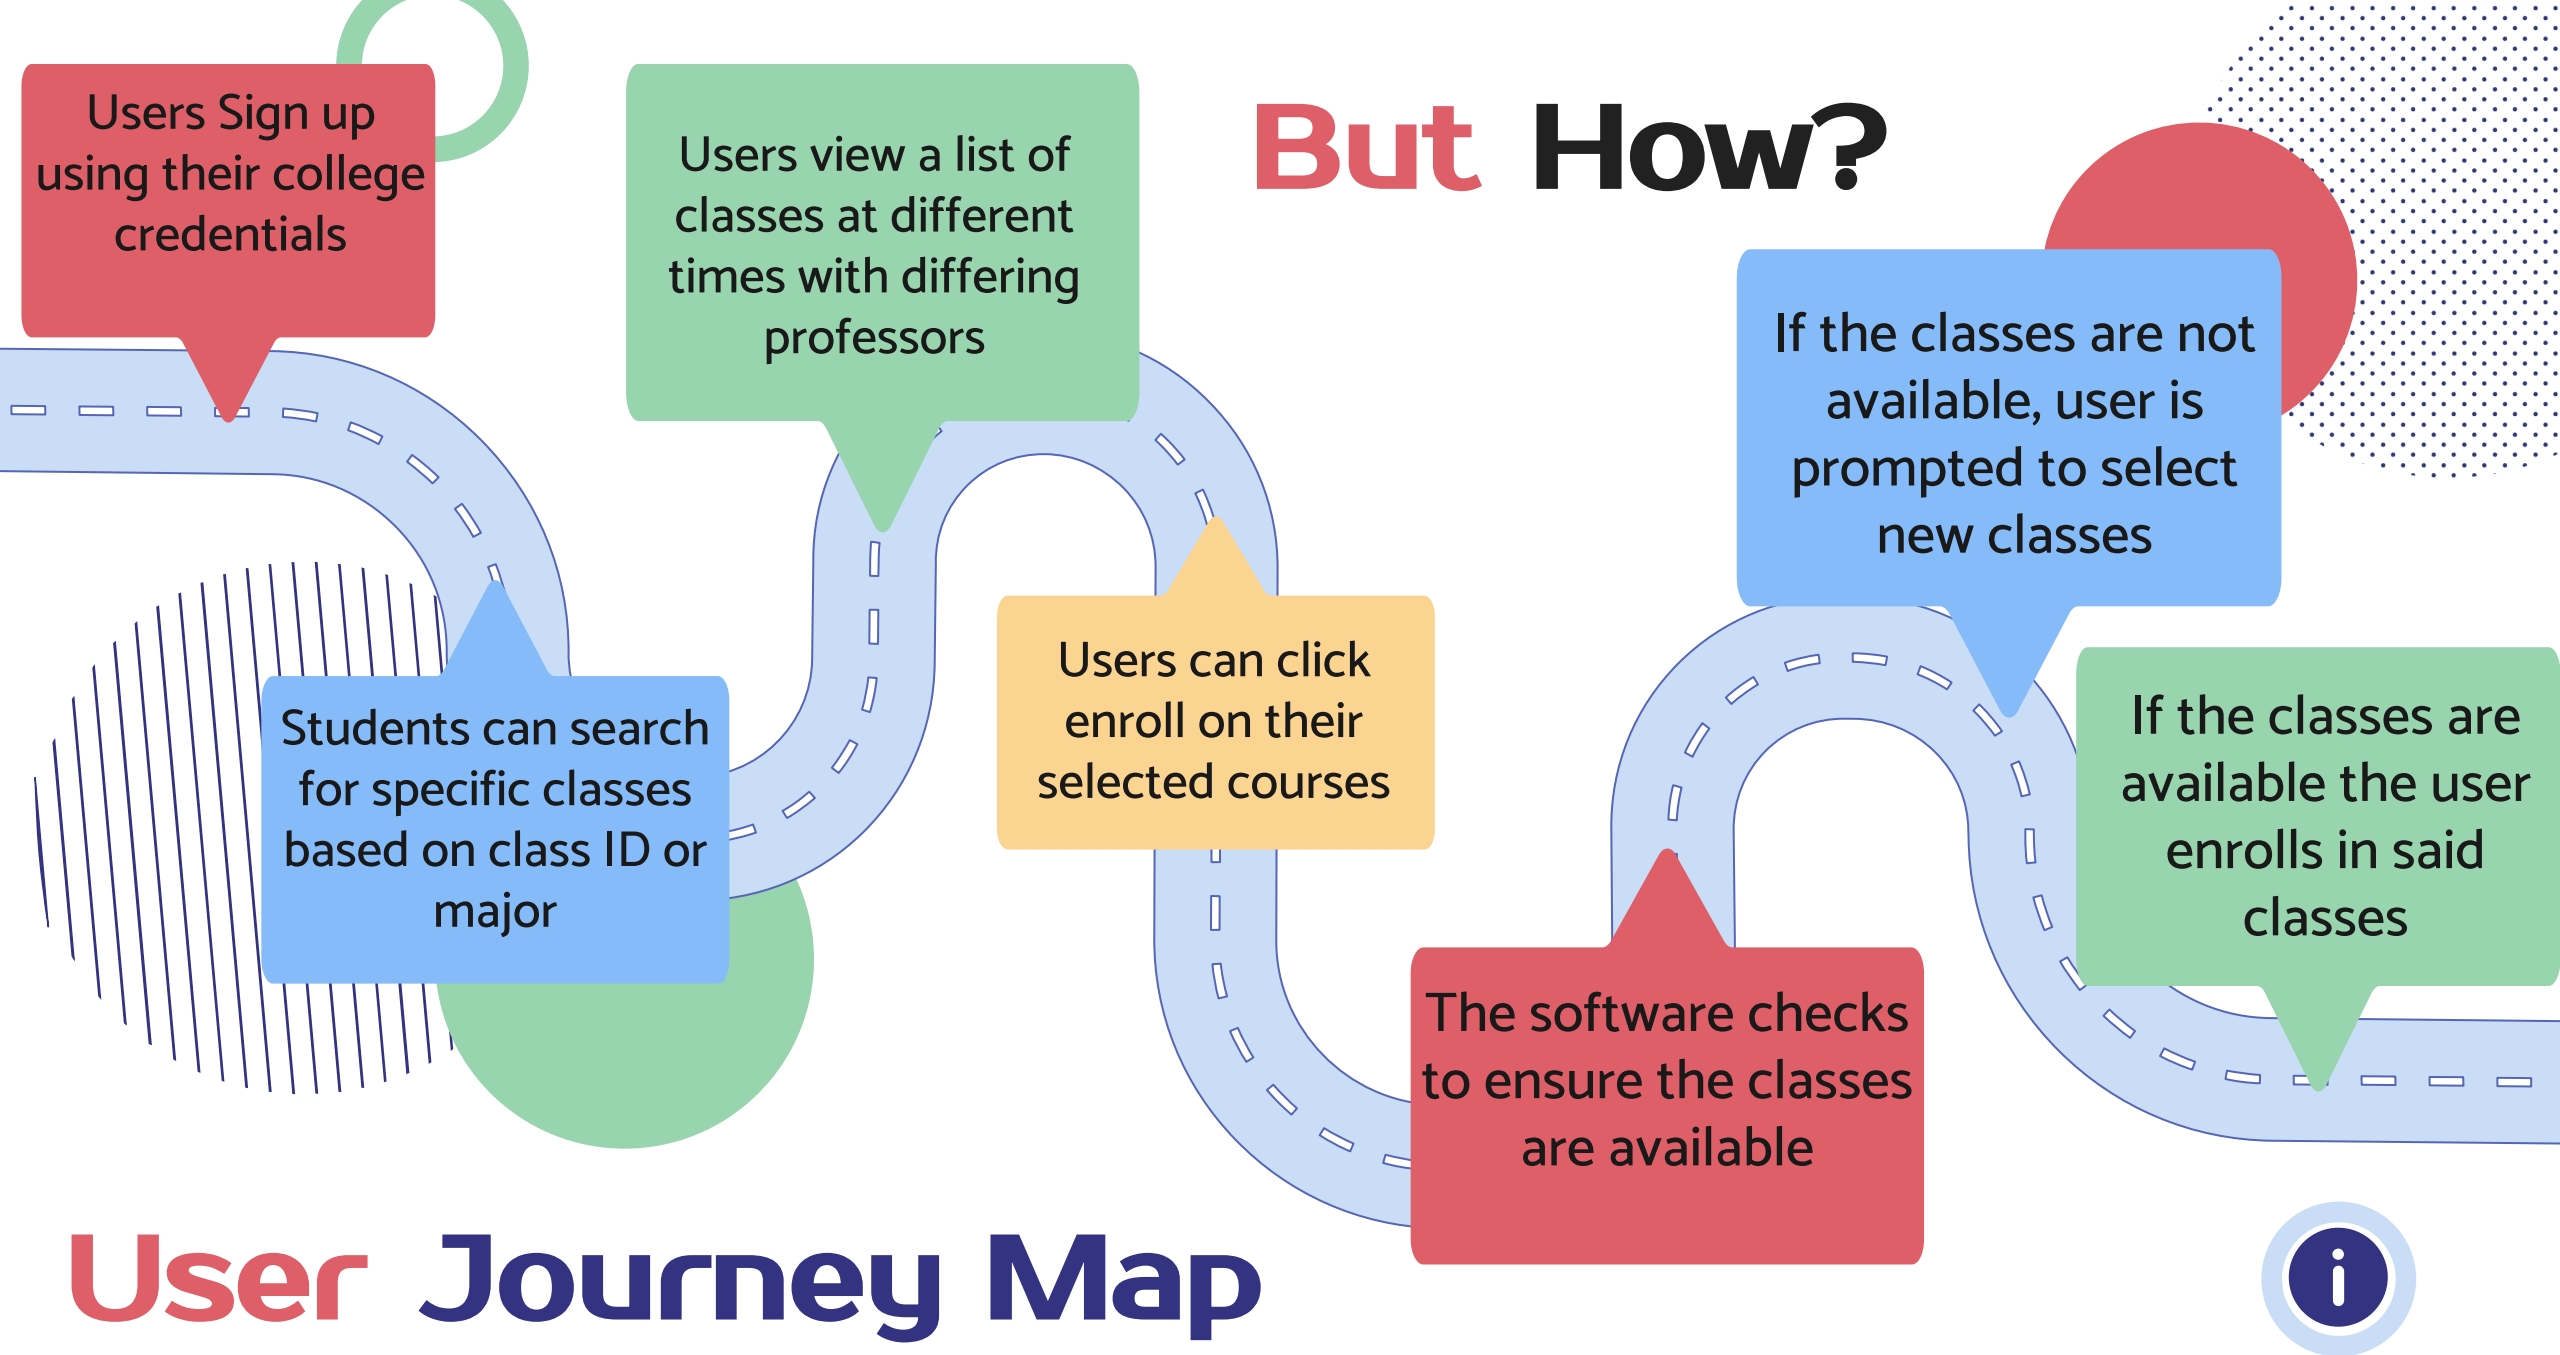

Schedule Snake will ensure swift enrollment into university courses free from delays and common registration issues that may stress both educators and students

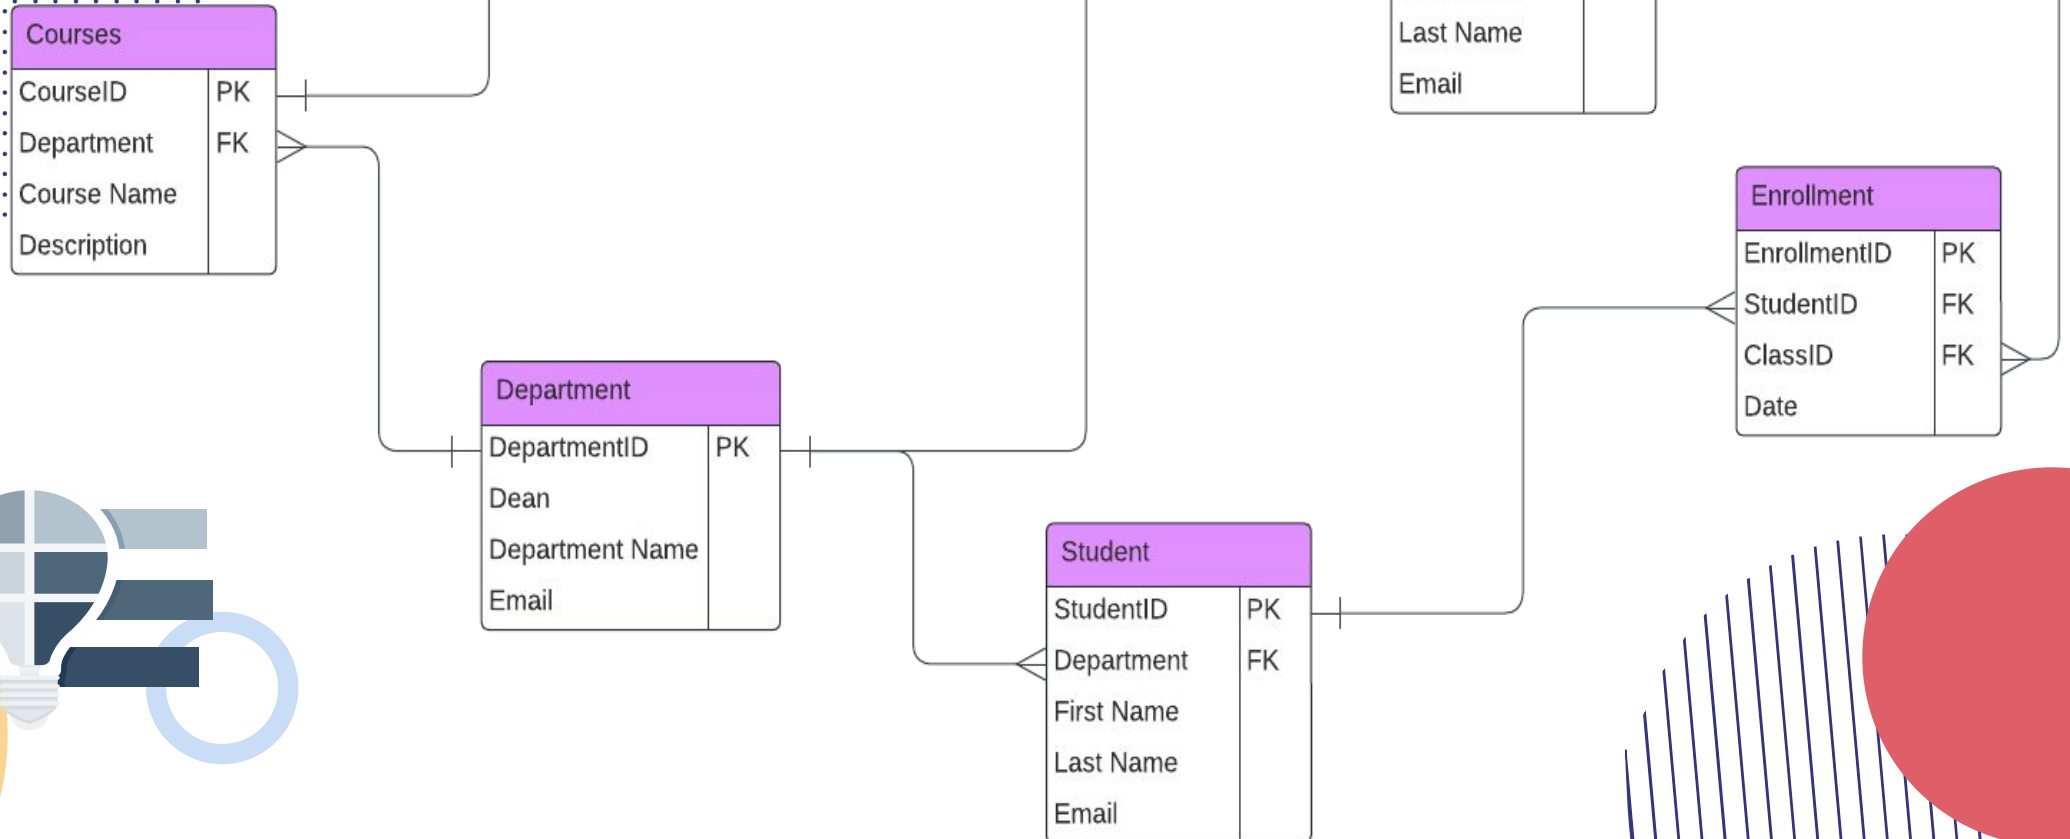

Our product can be used by universities struggling with hosting an efficient schedule building software. Our data can be valuable considering that we have insights on current trending courses and fields students are studying.

# But How?

# Data Model

# The Stack

## Frontend:

- Next.JS
- Tailwind CSS

## Backend:

- Node.JS

## Database:

- MySQL

## Repository & Deployment:

- Github
- Docker
